Opus Stone

# Opus Stone

Our Opus stones offer fresh, contemporary visuals in some of our largest tile sizes. From the travertine and concrete inspired Urbus to the sleek, limestone effect of Fumo, this range allows you to create a clean, modern design.

Aurego SP716

# Opus Enhance

Our most popular Opus products are available as a custom order with an enhanced slip resistance. Contact your Commercial Business Manager for more details about our Opus Enhance products.

Urbus SP213

It's not just the floor you lay, but how you lay it that makes a lasting impression. We offer numerous pattern possibilities to make the most of your space. Add design strips and borders for a truly unique look.

\* Subject to terms, please see our website. Full technical data is available on our website.

\*\* Slip resistance is measured on freestanding ex-factory product. Slip resistance can be affected by many factors including but not limited to: product installation and underlayment, surface contamination, use, wear and how the product is maintained. Textural variation along the surface of the product can affect nominal values.

## Color and Pattern Reproduction

We are careful to make sure our brochures are accurate and printed to very high standards, but photography and printing cannot always create a perfect representation of our products. For this reason we strongly recommend that you look at a sample of any product you are considering before placing your order.

All of our products are inspired by things we have seen in the natural world. Just as variation in color and detail is part of the unique beauty of natural materials, it is also a feature of many of our designs. This means that with some of our products you will see natural variation when your floor is laid. If in doubt, ask to see a larger sample of the product.
